## More efficiency on site with 3E-LOOK Mobile Solutions

End-to-end solutions include on-site processes. 3E-LOOK offers digital mobile solutions for processes such as measurement, service, maintenance, installation and after-sales. It fully integrates with the 3E-LOOK database and makes sure that the collected data is assigned correctly to the corresponding orders.

# 3E LOOK SOFTWARE

Efficiency for Window Companies

Windows are highly customized high-tech products. Their manufacturing involves numerous processes:

data entry, planning, work preparation, costing, procurement, production, delivery, installation and service.

A fully integrated solution provides the ideal foundation for digital efficiency.

## Production Planning & Control

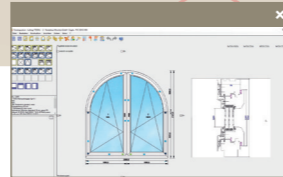

Paperless manufacturing, bidirectional communication, control room technology, and production logistics. Capture, analyze, and report on statuses. Digital integration with subsequent processes. 3E-LOOK provides a comprehensive data foundation for complex control and maximum automation.

## Window Technology & Web Configurators

3E-LOOK is multifunctional to meet the high technical demands in the manufacturing of windows and front doors made of wood, wood-aluminum, aluminum, PVC and PVC-aluminum. Integrated web configurators simplify the selection of accessories such as panels, aluminum cladding, fall protection, roller shutter boxes, and shading elements.

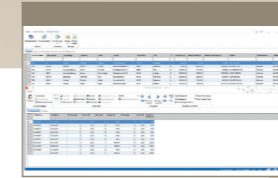

## Integrated Materials Management

Inventory, cutting, and procurement, all efficiently organized. The procurement process is fully electronic with digital documents, integrated inventory and backlog management, seamlessly linked with capacity planning and delivery logistics.

## Customers & Orders

Covers the full range of order processing with inter-company functionality and different target groups: end customers, dealers, and objects. The digital project folder makes project management simple and transparent, even across multiple company locations.

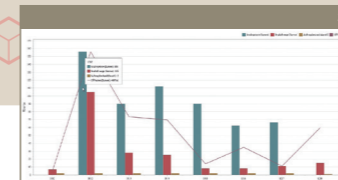

## Workflow Management

Smooth processes across the entire company. The end-to-end status management controls the order flow and regulates procedures. With dashboards, cockpits, and task management, your work is perfectly organized.

## Costing & Controlling

Highly flexible costing scenarios with markups and discounts, various discounting models and post-calculation. Instant margin visibility and credit limit checks for debtors.

## Mobile Solutions & Smart Scan App

For digital efficiency in all processes on the construction site and at the customer's location, with optimal information availability. 3E-LOOK provides mobile app solutions for measurement, service, maintenance, installation, and after-sales. Digital delivery note.

## Shipping Logistics, Rack Management & Installation

Make sure that everything is on board and know exactly where the components to be delivered are located. Rack and load carrier management, intelligent loading concepts, tour and route planning, and smart installation planning.

## Sales & Trade

Customer management with CRM, WEB-Sales with web-based sales organization and cloud solutions, online order processing between manufacturers and dealers.
